About Western Canadian Coal

Western Canadian Coal Corp. produces 3.5 million tonnes of high quality metallurgical coal from three mines- Wolverine, Brule and Willow Creek - located in the northeast of British Columbia. The company also has interests in various coal properties in northern and southern British Columbia and a 50% interest in the Belcourt Saxon Limited Partnership, which was formed to explore and develop the Belcourt and Saxon group of properties in northern BC. Currently, these properties provide the company with an estimated 15 years of coal reserves at current production levels.
